Home: Moscow (Russia)

ABOUT ME

Aspiring Quality Assurance Engineer with practical experience in manual testing, defect reporting, and test management. Proficient in Jira, Zephyr Scale, TestRail, and GitHub. Skilled in designing and executing test cases, identifying defects, and producing comprehensive QA documentation. Currently pursuing ISTQB CTFL certification.

EDUCATION AND TRAINING

Masters in Computer System and Networks

Higher School of Economics, Moscow [25 Aug 2025 – Current]

City: Moscow | **Country:** Russia | **Website:** www.hse.ru | **Field(s) of study:** Information and Communication Technologies | **Level in EQF:** EQF level 7

Russian Language Course

Higher school of economics, Moscow [1 Oct 2024 – 31 Aug 2025]

City: Moscow | **Country:** Russia

BS Computer Science

Institute of Southern Punjab Multan, Pakistan [1 Apr 2019 – 30 Sep 2023]

City: Multan | **Country:** Pakistan | **Level in EQF:** EQF level 6

Major Courses

- Linear Algebra - Differential Equation - Calculus & Analytical Geometry - Probability and Statistics - Discrete Structure - Economics
- Financial Accounting - Database Management - Data Structure & Algorithms
- Data Mining and Warehousing - Artificial Intelligence - Numerical Computing

PROJECTS

[4 Jun 2026 – 6 Jun 2026]

Swag Labs Manual Testing Project Conducted end to end manual testing of the Swag Labs e commerce web application. • Designed and executed 59 manual test cases covering Login, Inventory, Cart, and Checkout modules. • Performed functional, exploratory, positive, and negative testing. • Created comprehensive test scenarios and test documentation. • Executed test runs using TestRail and Zephyr Scale. • Identified and reported 6 software defects with detailed bug reports. • Generated test execution reports and test summary reports. • Maintained defect tracking and test management using Jira. • Prepared QA project documentation and portfolio artifacts in GitHub. **Tools Used:** Jira, Zephyr Scale, TestRail, GitHub, Google Sheets **Key Results:** • 59 Test Cases Executed • 46 Passed • 13 Failed • 6 Defects Reported

Distributed Library Management & AI Book Recommendation System

- Designed and implemented a modular Library Management System using object-oriented C++.
- Developed classes for book cataloging, author search, and AI-based book recommendation.
- Automated unit testing with Google Test to ensure core functionality reliability.
- Measured code coverage using gcov and LCOV, achieving over 70% line coverage.
- Generated project documentation automatically with Doxygen.
- Conducted performance analysis with Chrome DevTools and load testing using wrk.
- Implemented GUI testing automation with Nightwatch.js to validate web documentation behavior.
- Planned further improvements including database integration and RESTful API support.

[25 Sep 2025 – 8 Apr 2026]

Detection of anomalies in the big data of the financial sector using machine learning methods • Conducted research on financial anomaly and fraud detection using machine learning and deep learning. • Reviewed and analyzed 10+ academic papers covering GNN, CNN, GAN, and LSTM methods. • Identified and evaluated suitable open datasets including PaySim, Credit Card Fraud, and IEEE-CIS. • Performed initial data exploration and preprocessing on PaySim transactional data. • Prepared structured methodological summaries, figures, and model explanations based on supervisor feedback. • Planning to develop and compare ML and DL models for fraud detection using Recall, Precision, F1, and AUC metrics. • Built a Python-based anomaly detection pipeline with model explainability (SHAP, attention). • Completed full experimental evaluation and finalised thesis with results and analysis.

[7 Aug 2025 – Current]

Designing of a Distributed Database for a Multi-Branch Fitness Club Network • Designed a distributed database system for a multi-branch fitness club. • Built the full data model, including ER diagram and relational schema. • Planned data distribution using replicated and fragmented tables. • Used replication for core tables to improve consistency across branches. • Applied horizontal and vertical fragmentation for branch operations. • Documented system requirements, architecture, and data flow. • Produced technical diagrams and project documentation for MySQL implementation.

[14 Dec 2021 – 13 Jan 2022]

Face mask detection system Designed a real-time system to detect face mask usage, ensuring safety compliance in public and institutional settings.

[3 Oct 2021 – 16 Nov 2021]

Face recognition based attendance and classroom schedule system

Developed an automated system using face recognition technology to accurately record student attendance and streamline classroom scheduling. The system reduced manual errors, eliminated proxy attendance, and improved efficiency by integrating attendance tracking with real-time class schedules.

[23 May 2022 – 30 May 2022]

Homepage and Login Page Development Designed and developed a homepage and login system with a database backend, ensuring secure user authentication and data management.

[25 May 2022 – 15 Sep 2022]

Language Translator Developed a system to translate text between multiple languages, enhancing communication and accessibility.

[3 Nov 2022 – 22 Jan 2023]

Android voice calculator Developed a voice-enabled calculator for Android, allowing users to perform calculations through speech recognition for enhanced convenience and accessibility.

SKILLS

HTML 5 / Graphic designing / Social media marketing / Microsoft Office package: Microsoft Word, Excel, PowerPoint, Access / C++ / Python / SQL and design of relational databases / ML / MANUAL TESTING / Functional and Non-Functional testing / Regression testing / Smoke Testing / Exploratory testing / Usability Testing / Negative Testing / Validation Testing / End-to-end Testing / Bug Reporting / Bug Reporting and Bug

CERTIFICATES

[1 Oct 2024 – 31 Aug 2025]
Russian Language certificate

[2025]
Moscow Marathon

[2024]
DATA SCIENCE FOUNDATIONS

[2024]
INTRODUCTION TO CLOUD COMPUTING

[2024]
EXPLORING DATA TRANSFORMATION WITH GOOGLE CLOUD

[2024]
INTRODUCTION TO GENERATE AI

[2024]
INTRODUCTION TO RESPONSIBLE AI

[2024]
PYTHON FOR MACHINE LEARNINGAND DATA SCIENCE

[2024]
IMAGE RECOGNITION USING MACHINE LEARNING

[2024]
INNOVATING WITH GOOGLE CLOUD AI

LANGUAGE SKILLS

Mother tongue(s): Urdu

Other language(s):

English

LISTENING C2 READING C2 WRITING C1
SPOKEN PRODUCTION C1 SPOKEN INTERACTION C1

Russian

LISTENING B1 READING B1 WRITING B1
SPOKEN PRODUCTION A2 SPOKEN INTERACTION B1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user
